

CLAIMS:

1. A cathode ray tube comprising
an electron gun (5) for generating three electron beams (6,7,8),
deflecting means (51) for deflecting the electron beams (6,7,8) in a deflection
plane (20), and

5 convergence means (14) for dynamically influencing a convergence of the
electron beams (6,7,8), said convergence means (14) comprising coils (22) for generating a
magnetic field
characterized in that the coils (22) are provided with an electrically conducting layer.

10 2. Convergence means (14) for dynamically influencing a convergence of
electron beams (6,7,8), said convergence means comprising coils (22) for generating a
magnetic field, characterized in that the coils are provided with an electrically conducting
layer.
